Old Business	Ketamine- J. Bendit and L.Enzor discussed concerns the pharmacy committee had in regards to Ketamine	Forward to MAC	

Item	Discussion	Action Required	By Whom/When
	<p>which include cost, possible diversion, and having too many medications in the drug box. Also voiced concerns regarding the risk of med errors with drawing up pediatric doses. Discussion held regarding trialing Ketamine in the RSI drug box which requires a PI review with every use and motion made by K. Carroll and seconded by K. Jowers to move forward with sending ketamine draft to MAC for a trial in the RSI drug box.</p> <p>AHA Updates – AHA workgroup completed drafts of all protocols. All drafts to be emailed out to all of the members of the committee for review. Dr. Justis reviewed all drafts and made recommendations to add sepsis to list of reversible causes of cardiac arrest to all protocols with H&T’s, to add both formulas for determining MAP to protocols with MAP formula listed, and to determine if Dopamine dosing is recommended to be 2-10 or 2-20 per AHA.</p> <p>OB updates- OB workgroup completed all drafts of protocols and all drafts will be sent to committee members for review.</p> <p>Adenosine verbage – Wording on all Adenosine protocols changed “Antecubital preferred site if possible” and drafts completed – drafts to be emailed to committee for review.</p> <p>Burn updates – All updates made to reflect ABA’s recommendations as discussed at the last meeting. Drafts to be emailed to committee members to review.</p>	<p>Email drafts to committee</p> <p>Email drafts to committee</p> <p>Email drafts to committee</p> <p>Email drafts to committee</p>	<p>R. Blymyer</p> <p>R. Blymyer</p> <p>R. Blymyer</p> <p>R. Blymyer</p>
New Business	<p>Permissive hypotension – presentation made by paramedic student S. Craig regarding permissive hypotension in trauma patients. Recommendation made to make target BP range 90mmHg-100mmHg in trauma protocol.</p> <p>Epi protocol – K. Carroll brought up that there are 2 separate doses listed under Epi (weight based and titrate to effect) – recommendation made to remove the weight based dosing and only leave the 2-10mcg/min titrate to effect.</p> <p>Abdominal Pain protocol- K. Carroll brought up concern regarding need for an abdominal pain protocol and will begin drafting an abdominal pain protocol to present to PPP committee.</p>	<p>Update trauma protocol</p> <p>Update protocols</p> <p>Draft protocol</p>	<p>R. Blymyer</p> <p>R. Blymyer</p> <p>K. Carroll</p>
