Auditoriums 1 & 2**

1301 Sam Perry Boulevard, Fredericksburg Va. 22401

Balance-the-Bleed is a follow-up presentation to the Stop-the-Bleed campaign that MWH Trauma Services kicked off this past Spring. In this presentation, we will take field providers into the immediate steps following bleeding control, concentrating on balancing fluid administration with the patient's hemodynamic status. We will discuss current fluid resuscitation guidelines, as well as the benefits of blood product administration and how to prepare a patient to receive blood products for the best possible outcome.
