Item	Discussion	Action Required	By Whom/When
	<p>D. Justis- is there higher cases of flash pulmonary edema IM vs IN vs IV? A. Louka denied seeing many cases, however recently he has seen patients with fentanyl and cocaine, when they are given Narcan they stroke out because of the cocaine. EMS providers will probably begin seeing it and have to perform seizure management and airway management.</p> <p>E. Vest reported that EMS training regarding overdosing is to focus on ventilating patient before administering Narcan.</p> <p>M. Doak said that ODEMSA and Tidewater Councils are meeting in person and wanted to know if PEMS is moving that direction. S. Pincus reported PEMS is following the example set by the Office of EMS.</p>	<p>Talk with Chief about Committees returning to in person meetings</p>	<p>S. Craig/7-14-21</p>
<p>Good of the Order</p>	<p>Next Meeting: Wednesday July 14th, 2021 at 10:00 am November 3-7, 2021 VA EMS Symposium</p>		
<p>Adjournment</p>	<p>Attendance verified. Meeting adjourned at 11:25 am</p>
