Operational Medical Director:

The Peninsulas EMS Council, Inc. provides a Regional Protocol Test for use by Operational Medical Directors to assess knowledge of the PEMS Regional Patient Care Protocols, Policies and Procedures. The Protocol Test is a 50 question multiple choice test distributed in an “A” and “B” version (approximately six months apart). The tests are distributed electronically, directly to participating OMDs.

In order for this test to be useful, the security and integrity of the test must be protected. To facilitate this, the test will only be distributed by the PEMS Field Coordinator - Clinical Care to operational medical directors who have signed an agreement to accept responsibility for the security of the test. Operational medical directors may, at their discretion, forward the test to a trusted agent of the EMS agency or agencies they represent.

Please note that Peninsulas EMS Council retains no responsibility for the integrity of the test once distributed to our operational medical directors and will not support more than two revisions per year.

Please read and sign the below statement. The document may be returned by mail, facsimile, or scanned and attached to an email addressed to sraig@vaems.org.

I _____, hereby agree to participate in the Peninsulas EMS Council protocol testing process. I agree to protect the security and integrity of the test and will only release the test to a trusted agent of the agency which I represent as Operational Medical Director. This agreement will remain in place until such time as I request to stop receiving the protocol tests or until I no longer represent the agency as operational medical director. I understand that no costs will be attributed to me or the agency I represent for use of the protocol tests.OM
